

Please call Rex Riley in the Imaging Department at 336-373-7166 with any questions.

Dear Customer using Adobe Acrobat 3.1:

Below are screen shots of Adobe Acrobat Distiller 3.1 Job Options window which illustrate the compression and font embedding we use at the News & Record. To change settings: get the epilogue.ps and prologue.ps files and drag them into the Adobe Acrobat folder.

1. Go to the Adobe Acrobat Applications folder on your hard drive. There you will see a folder called Xtras.
2. Inside Xtras folder will be "high_end" folder. Drag epilogue.ps and prologue.ps into the Acrobat folder with distiller.
3. Now you are ready to open Acrobat Distiller. Go to Settings on the menu bar and select Job Options. A window will open with four tabs for you to change.
